WORK EXPERIENCE

Maison Di Giorgio   Fukuoka, Japan
CEO   Mar 2021 - Present

- Complete, start to finish creation of web-applications/experiences ranging from e-commerce to in-house management solutions
- Web development (frontend & backend)
- Web development (frontend & backend)
- Proposal & design specification creation, working with the client to create unique and eye-catching web design (UI/UX) for digital experiences including 3D elements

Asia Quest   Fukuoka, Japan
Software Engineer   Sep 2023 - Present

- Lead Frontend development for multiple projects
- UI design/development for projects ranging from LINE applications (mobile/web) to SPAs for proposals/development
- Project management for a cross-borders project, liaising between our Japanese clients, inner-company members and members from our overseas office (Indonesia)
- Participated/lead community events primarily based around frontend development
- Created backend solutions using Node.js, Java and PHP
- Mobile Development (Swift/Kotlin)
- Collaborated with industry leaders to debug issues with Android's native NFC connections
- Lead multiple projects which were forecasted to exceed deadlines back on track (one in particular finished 2 months ahead of schedule)
- Worked Directly with designers to create a complete UI design system for an online learning platform
- Lead in-house learning events on topics from Typescript to ThreeJS
